MONTGOMERY COUNTY DEPARTMENT OF
PERMITTING SERVICES

Wall Bracing/Framing Inspection Required

If a Building permit requires the installation of wall bracing per IRC Section R602.10, a partial **framing inspection must be scheduled**. This inspection *must* occur *before house wrap is installed over the structural sheathing.*

Instructions

If your inspection is for an **addition/alteration**, the **004** code will be used for a partial framing inspection for wall bracing. A note for wall bracing is to be requested at scheduling (Just as is done for a low floor framing inspection).

If your inspection is for a **Single Family Detached/Duplex/Townhouse**, the code will **041** and the request is for a wall bracing partial framing.

If you have any questions, please call Steve Thomas 240-777-6216.
